POSSE PROJECT

Imagine a world where the boundary between myth and reality blurs in the heart of North America's last untouched forest.

The XRPL Forest

The XRPL Forest is under siege by corporate greed, "The Posse" a coalition of forest animals, and enlightened humans fight not just for their home, but for the survival of life on Earth against an impending cosmic event.

In the XRPL Forest, where the trees hold secrets and the wildlife whispers of danger, an unprecedented alliance forms. Led by Orlo, a sage opossum, the animals of the forest are on the brink of losing their sanctuary to the relentless advance of globalist corporations, hungry for resources to feed humanity's addiction to comfort and security.

But this isn't just a story of resistance; it's a tale of evolution. Some who come to the forest discover that the forest holds more than just resources and beauty. Ancient carvings in the cliffs warn of a magnetic pole shift and looming micro nova, events that could redefine life on Earth. For those who can understand the carvings the animals invite on a journey of learning to evolve beyond modern human constraints, embracing nature's wisdom to survive what's to come.

"The Last Stand of XRPL Forest" is an epic saga where:

Nature Fights Back: Animals use their innate abilities against the globalist and addicted humans, showcasing a blend of mischief, strategy, and the forest's own mysterious magic.

Humanity's Awakening: Humans learn from the animals, adapting to live in harmony with nature, preparing for cosmic changes that could alter civilization as we know it.

A Race Against Time: As the globalist's corporate machines push forward, the Posse must outwit, outlast, and outmaneuver to protect their home, leading to climactic confrontations where the very essence of the forest might rise to defend itself.

This story isn't just about saving a forest; it's about saving humanity from its own destructive path, offering a narrative rich with humor, action, heart, and a message of hope and symbiosis. It's a tale for our times, where the future of the planet hangs in the balance, and the answer lies in the ancient, whispering wisdom of the woods.

NFT holders can also allow other \$POSSE or Affiliated Projects coin holders to order a puppet of their NFT. NFT holders that open their NFT Puppet to the public will get 5% of any sales related to that NFTs Puppet. The 5% comes from the Founders cuts of sales. These are real physical products purchasable by the NFT and eligible coin holders. The puppets are copies of the NFT but with movable joints(no movable joints on fabric stuffies). These puppets are great for playing with, decoration, creating memes and stop motion gifs. We encourage community members to share their creativity and imagination with their puppets on social media.

Puppets can be ordered in the Discord and soon on the web site. Shipping costs are not included in the NFT price. Shipping can be paid in XRP and eligible tokens.
